Crossrail, the ‘Elizabeth’ line, is simply the latest way of traversing a very old east-west route through what was once countryside to the city and out again. Visiting Stepney, Liverpool Street, Tottenham Court Road and Oxford Street, Gillian Tindall traces the course of many of these historical journeys across time as well as space. The Tunnel Through Time uncovers the lives of those who walked where many of our streets still run. These people spoke the names of ancient farms, manors and slums that now belong to our squares and tube stations. They endured the cycle of the seasons as we do; they ate, drank, worked and laughed in what are essentially the same spaces we occupy today. As Tindall expertly shows, destruction and renewal are a constant rhythm in London’s story.

The Tunnel Through Time

Examine the inner workings of the mind and learn what consciousness and a sense of self really means - and if it even exists. We’re used to thinking about the self as an independent entity, something that we either have or are. In The Ego Tunnel, philosopher Thomas Metzinger claims otherwise: No such thing as a self exists. The conscious self is the content of a model created by our brain-an internal image, but one we cannot experience as an image. Everything we experience is “a virtual self in a virtual reality.” But if the self is not “real,” why and how did it evolve? How does the brain construct it? Do we still have souls, free will, personal autonomy, or moral accountability? In a time when the science of cognition is becoming as controversial as evolution, The Ego Tunnel provides a stunningly original take on the mystery of the mind.

The Ego Tunnel

The Time Tunnel was by no means a superb product of Friday night entertainment. If the plot holes were not as large as the tunnel itself, viewers noticed the same props from Allen’s other television programs popping up on the show. Fan boys to this day still debate whether the futuristic episodes involving space aliens were better than the historic adventures, but few would deny that Lee Meriwether made a lab coat look sexy. Meriwether herself recalled how the cast received letters from school teachers who used The Time Tunnel to stimulate interest in history in the classroom. This 546 page book documents the entire history of the program, the origin and conception of the series, why it never ran a second season, almost 200 never-before-published behind-the-scenes photographs, and a detailed episode guide including dates of production, music cues, episode budgets, salary costs, deleted scenes that were filmed, memories from cast and crew, bloopers, trivia and much more!

The Channel Tunnel Story
This story, my story, was not one that I imagined would ever be put into words on paper. Rather, I believed it was enough to have lived it; at times, even living it was more than I could bear. I did not foresee this written version. Had I done so, I would have remembered more or less. Therefore, I am calling this ‘fiction’ based on fact. I will, for effect and constraints of time and paper, condense some incidents. For privacy and legal necessity, I will change some names. But, this is my story, my life, here on these pages for all to see: family, friends, enemies, acquaintances, peers, and my unknown readers.

Lost in the Tunnel of Time
This book traces Peter Howard, who was to become one of The Wooden Horse escapers, from his being shot down, through his capture, interrogation and first two POW camps. It gets into the mind of a man determined to escape his captors. It shows that for all the many schemes dreamt up, very few ever got started and of those only a tiny handful ever came to fruition and of those a few ‘true’ runs® was as rare as a lottery win. But none of this could suppress the determination, ingenuity and courage of those who were driven to try. This is a thrilling opportunity to read what is virtually a lost masterpiece of the Prisoner of War escaping scene.

In Jamil Nasir's Tunnel Out of Death, Heath Ransom, former police psychic turned machine-enhanced "endovoyant" private investigator, is hired to find the consciousness of the rich and comatose Margaret Biel and return it to her body. Tracking her through the etheric world, he comes upon a strange and terrifying object that appears to be a tear in the very fabric of reality. He falls into it—and into an astonishing metaphysical shadow-play. For Margaret is a pawn in a war between secret, ruthless government agencies and a nonhuman entity known only as "Amphibian." Their battlefield is a multi-level reality unlike anything humankind has ever imagined. When Heath learns to move back and forth between two different versions of his life, and begins to realize that everyone around him may be a super-realistic android, that is only the beginning of a wholesale deconstruction of reality that threatens more than his sanity.
